 COZZINI MATERIAL HANDLING SYSTEMS

VAT/COMBO DUMPER

- All dumpers utilize Cozzini-built, stainless steel, Ø4" (102 mm) diameter hydraulic cylinders.
- Self-lubricating polymer bushings in stainless steel housings. No more broken castings, rust or grease.
- Extra-heavy, industrial-strength, dependable construction.
- Counterbalance valves ensure utmost safety by supporting loads if the hydraulic system fails.
- Soft-shift valving system completely eliminates operator "bump" discharge motion, a problem that can significantly damage the dumper and creates safety hazards.
- USDA accepted and CE approved. Built in conformity with AMI sanitary equipment design principles.

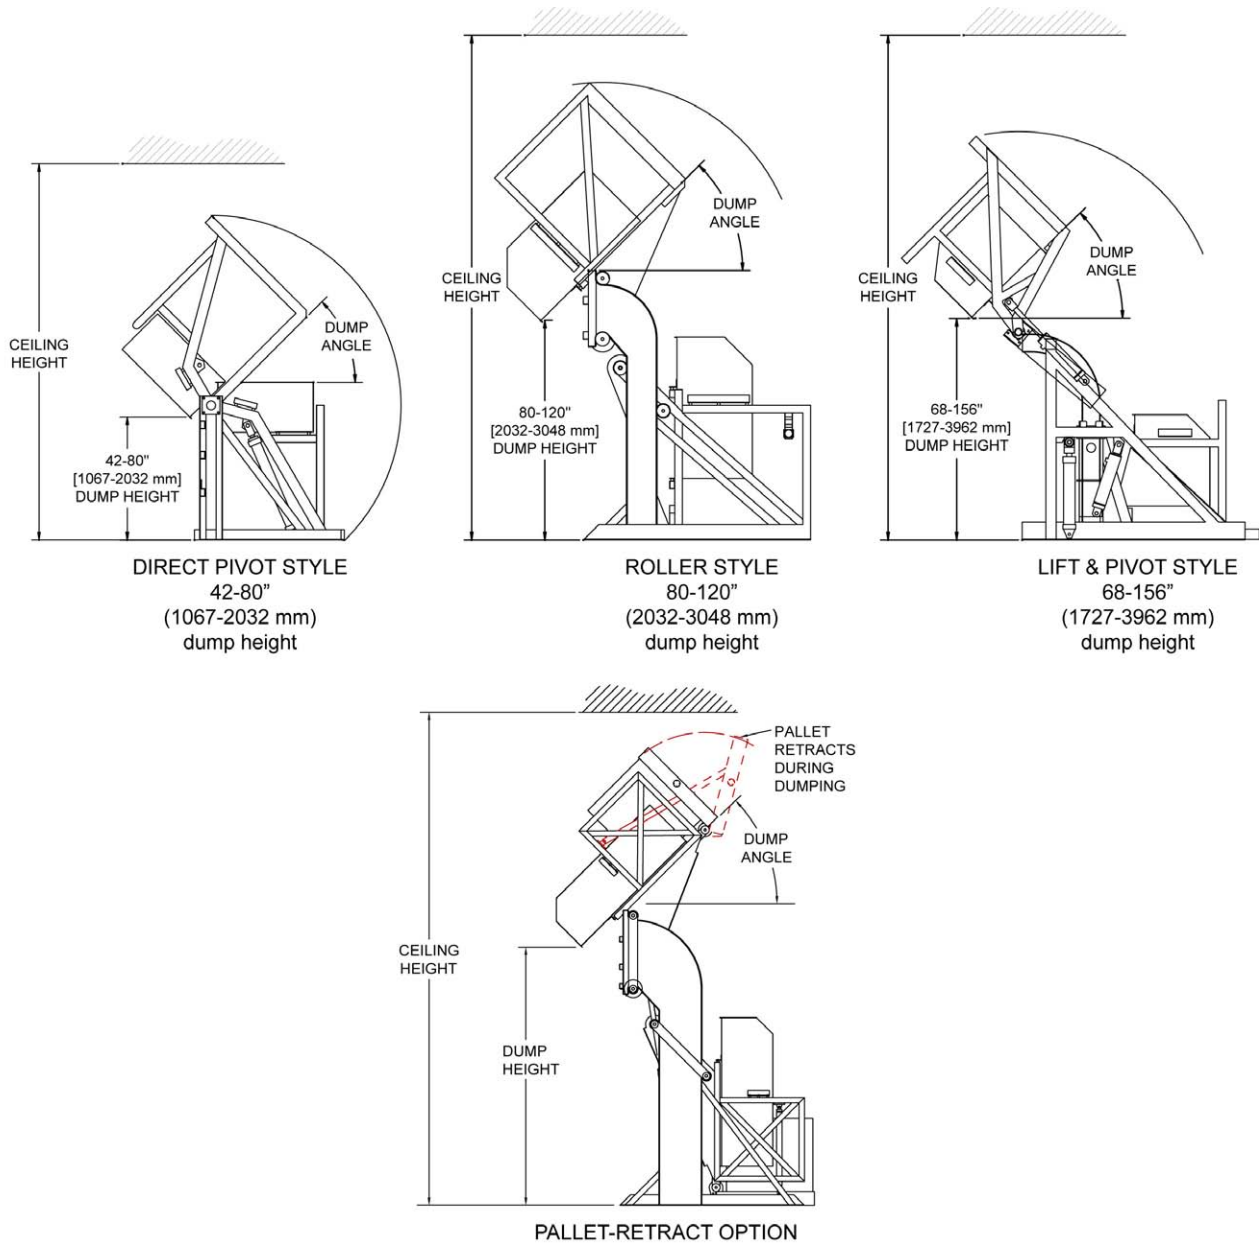

Shown with optional discharge chute and juice saver. Other options available.

VAT/COMBO DUMPER

Regardless of how unique or complex your heavy, bulk-dumping application, the Cozzini team of material handling specialists are experts at engineering custom solutions to tough problems. With decades of hands-on experience, the Cozzini team designs and builds robust, dependable dumping systems that are efficient, clean, safe and reliable.

Built from the ground up with full washdown sanitation in mind. Heavy-duty stainless steel construction throughout with fine sanitary finish.

Cozzini vat and combo dumping systems are available in a broad range of load capacities, dumping heights and configurations. 400 lb. (185 kg.) and 600 lb. (275 kg.) cart attachments available.
