

## RP-200

### Broad-Based Functionality in a Flexible and Economical Format

- Semi-rigid packaging or flexible packaging capability.
- Follows all aspects of RapidPak design philosophy including the American Meat Institute's principles of sanitary design.
- Easily relocated to meet packaging production requirements throughout the plant.
- Semi-rigid tooling with 360° matched metal cutting for meat and food applications as well as blister packaging of consumer goods.
- Flexible tooling with flying knife or guillotine cutting.
- Variety of optional devices available for specialized packaging applications.

*Vacuum Forming Station*

*Top and Bottom Heating Stations*

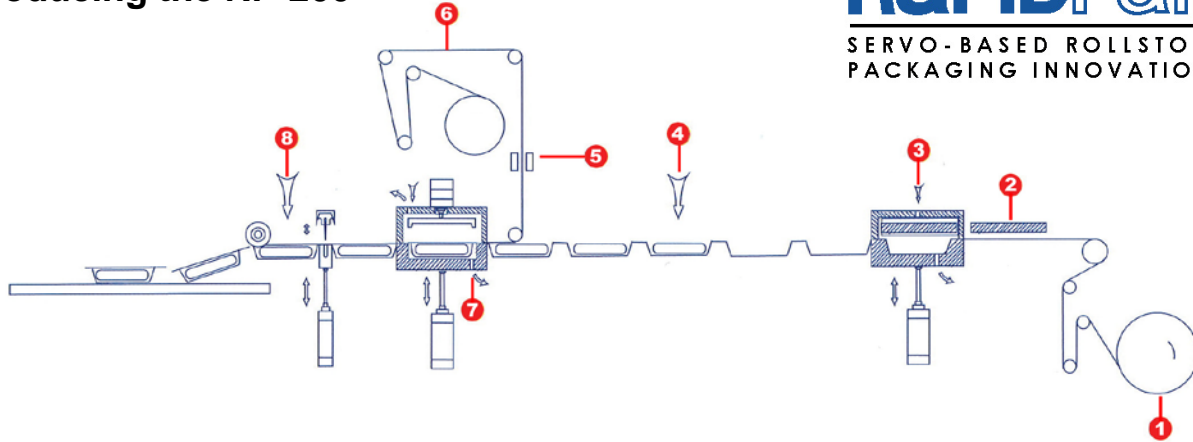

*Matched Metal Cutting*

*Vacuum / Sealing Die*

You know RapidPak as the worldwide leader in large, high capacity, servo driven rollstock packaging technology. You demanded it and now RapidPak delivers the same large-machine passion for innovation and introduces an amazing new low volume machine to address your needs at the opposite end of the market.

## Introducing the RP-200

**RAPIDPAK**  
SERVO-BASED ROLLSTOCK  
PACKAGING INNOVATIONS

1	Forming film	5	Code printer optional
2	Pre-heating optional	6	Top film
3	Thermoforming	7	Sealing station (vacuum/gas flushing/MAP optional)
4	Loading Area	8	Cutting stations (matched-metal 360° cutting available)

This versatile machine can produce the entire gamut of packaging types, including semi-rigid, at a price point that makes it affordable for applications where high volume/high speed are not a requirement.

Until now, low-end machines on the worldwide market fell into a category that can only be described as deficient. Not anymore! Here it is: broad-based functionality at an affordable price!

<b>Electrical</b>	<b>Compressed Air</b>	<b>Water</b>
220 V / 60 Hz / 3 ph, 32 A	80 psi at 40 CFM	30 gal/hr
